## Sametime Awareness Servlet Disclaimer

---

The code provided with through the Sametime Awareness Servlet is provided AS IS without warranty or support. If you should wish to have modifications made to the servlet, Instant Technologies does offer a dull range of Sametime consulting services.

### Sametime Awareness Servlet Install

---

The Sametime Awareness Servlet installer is a windows application, that should be ran on the Lotus Sametime Server. During the installation the server details should be entered as requested and a user name of a registered Sametime user should also be provided.

During the installation, the installer performs the following steps:

1. Copies the existing Servlet.properties file to OriginalServlet.properties file. The servlet.properties file can be found in the Domino data directory.
2. Creates a new Servlet.properties file and appends two lines that point to the Sametime Awareness Servlet.
3. Places the following files into the domino HTML directory:
  - Stawareness.js
  - SampleAwarenessHTML.htm
4. Places the following files into the Domino\Data\domino\servlet\itsametimeawareness directory:
  - 0.jpg
  - 32.jpg
  - 64.jpg
  - 96.jpg
  - 128.jpg
  - 544.jpg
  - 608.jpg
  - InstantTechSametimeWebAwarenessServlet.properties
  - WebAwareness\$AwarenessManager.class
  - WebAwareness.class

### Modifying Sametime Awareness Servlet Settings

---

There are a few options that can be changed within the Sametime Awareness Servlet.

#### Changing the image returned

A key feature that can be changed is the image that is returned for a users status. To change the image returned for a users status, using an image editor modify one of the existing jpg files which exist in the Data\domino\servlet\itsametimeawareness directory.

#### Changing the rate at which the status image is refershed

By default the sample HTML page refreshes the awareness image for a user every 10 seconds. This value can be increased or decreased. The value can be changed by editing the stawareness.js file located in the Data\domino\HTML directory and changing the line:

```
var STAwarenessRefreshInterval = 10 //Default value in seconds between awareness refresh
```
