What's new in Instant IMtegrity 5.41

Improvements:

- Updated the product documentation with a new topic "Limiting the size of the chat log database" to aid administrators in effectively managing the size of the Instant IMtegrity chat log database .
- No code changes have been made; this release is a documentation update only.

What's new in Instant IMtegrity 5.4:

Improvements:

- Greatly improved handling of transient file access errors (such as files temporarily locked by virus scanners, etc):
    - Locked chat log files to be imported will be skipped and re-tried again later.
    - Locked image files to be imported will be re-tried a few times. If the image files can't be imported, the log file will be skipped and re-tried again later.
    - Locked image files to be deleted will be re-tried a few times. If the image files can't be deleted, they will be marked for deletion later and the log file import will succeed .
    - Imported files marked for deletion will be periodically re-tried for deletion until they can be successfully deleted.
    - New IBM Domino server statistic "`Instant.IMtegrity.Import.Logs.Skipped`" counts skipped logfiles
    - New IBM Domino server statistic "`Instant.IMtegrity.Import.Deletions.Pending`" counts files current marked for deletions
      All statsistics are available via console command "`show stat Instant`"
- New console server command "`tell IMtegrity reset`" to reset all Instant.IMtegrity runtime statistics.
- In the IBM Notes Client chat logs can now be full text searched in the search bar via the "Author..." and "Fill out example form" conditions
- All views now include an action button "Search Bar" to toggle the full text search bar on/off.

What's new in Instant IMtegrity 5.31:

Improvements:

- Fixed a server crash when sending very large instant messages while the option "Enable IMtegrity diagnostic output" was enabled and running in debug mode.
- Optimized internal diagnostics code to minimize memory consumption and performance when running in debug mode.

What's new in Instant IMtegrity 5.3:

Improvements:

- Fixed error "Overflow (#6) in classFileEnumerator:CFILEENUMERATOR::ENUMLOGFILES (line 170)" when trying to import more than 32K chat log files at once.
- Optimized import process to reduce CPU spikes and memory consumption when importing large amounts of log files at once.

What's new in Instant IMtegrity 5.2:

Improvements:
- Real-time chat rules and disclaimer rules now work with IBM Sametime servers configured for LDAP directories.
- Added more detailed logging to aid in troubleshooting and customer support.
- Fixed an issue with attachment file names containing two exclamation marks, like "theReport!!!.xls"

What's new in Instant IMtegrity 5.1:

New features:
- New action rule option to retrieve and include additional Domino Directory fields for chat participants.
- New action rule option to stop processing any further action rules.
- Added print-optimized chat form.
  To use, from any View select File, Print..., Documents Style, then "An alternative Form" and select "Chat (Print-optimized)".

Improvements:
- Custom X-Headers for SMTP emails now have their values quoted to preserve empty values for multi-value fields.
- Updated installer to require IBM Sametime Version 8 or higher.
- Re-categorized help/documentation database.

What's new in Instant IMtegrity 5.02:

New features:
- New customizable real-time chat rules to enforce "ethical firewalls" which control who can chat with whom. (5.0)
- New customizable real-time disclaimer text rules to send disclaimer texts to users. (5.02)
- New option in the IMtegrity configuration tool to start/stop the Sametime ST Place service. (5.0)

Improvements:
- The IMtegrity server add-in task command "tell imtegrity help" now works via Remote Console and Java Console. (5.01)
- Improved support for Chat Announcements (requires IBM Sametime 8.5.x servers) (5.0)
- Improved installation for IBM Sametime 8.5.x servers. (5.0)
- Improved API support for IBM Sametime 8.5.x servers. (5.0)
- Improved overall performance. (5.0)
- Improved rich text import of HTML chats (5.01)
- Improved documentation (5.02)
