

Instant Archive Viewer for OCS

Charting and Reporting Now Available

Charting and Reporting for OCS is an XML based charting engine rendering statistics from your Office Communications Server in a cool flash bar graph or pie chart. All reports will be totally customizable and allow you to drill down by date and filter by users. The information is retrieved using SQL queries inside XML pages and viewed on pages hosted on the IIS server. Check it out:

<http://demo.instant-tech.com/demo/reports/index.aspx?module=ChartingReporting>

What's New for Instant Archive Viewer for OCS

Added:

- Over 20 charts for IM, conferences and VoIP
